

INDIVIDUAL ADVOCACY

IMPROVING CLIENT DATA MANAGEMENT & MEDICAID CLAIM EFFICIENCY

New Access Database Overview

Ju-Lynda Vaughn

Revenue Cycle / Business Analyst

EXECUTIVE SUMMARY

A centralized database that unifies client records, case manager activity, and Medicaid billing data reducing errors, improving access to information, and tracking over \$100K in monthly revenue."

WHAT THE SYSTEM DELIVERS:

- One source of truth for 400+ clients
- Immediate visibility into authorizations & unit usage
- Faster, more accurate Medicaid billing
- TCM-friendly workflows and customized reporting
- Improved compliance and service continuity

PROBLEM

Fragmented data caused recurring billing delays, incomplete client records, and preventable revenue loss.

KEY CHALLENGES:

- Average of \$5K+ monthly at risk due to various claim issues
- 400+ client records scattered or incomplete
- No centralized billing hub for claim status or authorization info
- Unknown authorization lapses risking service interruptions
- Manual processes created delays and inconsistent data accuracy

SOLUTION

A unified Client & Medicaid Billing Database that streamlines billing, improves data accuracy, and supports day-to-day TCM operations.

KEY CHALLENGES:

- Centralized data access for clients, TCMs, and units
- Faster claim tracking across all months
- Automated authorization visibility to prevent lapses
- Accurate monthly billing + cross-checks
- Instant reports for management and case managers

DATABASE ARCHITECTURE

Designed for stability, separation of duties, and future scalability.

Tables

Client Master Table
Monthly Billing Tables
Case Manager
Client Information
UHC Clients

Forms

Billing Entry
Client Lookup
TCM Tracking
Client/TCM Editing

Reports

TCM Client List & Units
Overall Unit Usage
Authorizations
Ad Hoc Views

WORKFLOW OVERVIEW

MAIN MENU

- Central navigation for all billing months, client views, and reports

VIEW DATA

- TCM-specific views
- UHC authorization tracking
- Client search and year-at-a-glance summaries

ENTER DATA

- Monthly billing entry
- Cross-checks prevent unit discrepancies

REPORTING

- Monthly billing output for management
- TCM unit usage reports
- Overall unit summaries

MONTHLY BILLING FORM

Ensures accurate billing by combining unit entry, claim information, and built-in validation.

KEY FEATURES:

- Top form: TCM unit entry + automatic total calculation
- Bottom form: Monthly billing details, claim numbers, and notes
- Cross-check logic ensures unit totals match
- Conditional formatting: Unpaid claims flagged in red
- Search & filter for multiple clients

WHY IT MATTERS:

- Reduces manual errors
- Supports real-time claim status tracking
- Improves month-end billing accuracy

REPORTING

Overall Units Used

MCO	CLIENT	MED ID	Init. Units	PA	Remain	Used	Jan	Feb	Mar
H	Client 1	12364	240	0	100	140	50	40	50
H	Client 2	45874	240	0	220	20	0	20	0
S	Client 3	13256	240	0	200	40	0	0	40

Sample Data

*PA – Prior Authorization Additional Units

OVERALL UNITS REPORT:

- Management-level summary
- Displays units granted (PA additional units) and monthly units used
- Supports service continuity and audit requirements

Overall Units Used - TCM

MCO	CLIENT	MED ID	IU	PA	Remain	Used	Jan	Feb	Mar	Apr
H	Client 1	12364	240	0	100	140	50	40	50	
H	Client 2	45874	240	0	220	20	0	20	0	
S	Client 3	13256	240	0	200	40	0	0	40	

Sample Data

*IU – Initial Units

*PA – Prior Authorization Additional Units

TCM UNITS REPORT:

- Filtered by TCM using their initials
- Shows unit usage across all clients
- Includes secondary TCMs if applicable. This happens when filling in for case manager

IMPACT AND VALUE

The new database improves accuracy, transparency, and revenue protection across the organization.

MEASURABLE BENEFITS:

- Protects \$5K+ monthly revenue previously at risk due to denials
- Eliminates manual tracking of units and claim status
- Improves compliance with authorization requirements
- Creates an audit-ready trail for all billing data
- Scales for future forms, reports, or additional services

TECHNICAL SIDE OF THINGS

```
1 SELECT
2   MasterClientList.[Client Name],
3   MasterClientList.[Medicaid#],
4   MasterClientList.[MCO],
5   MasterClientList.[DOB],
6   "January" AS [Month],
7   Jan_Billing.[UNITS],
8   Jan_Billing.[OTCM units],
9   Jan_Billing.[Total Units],
10  Jan_Billing.[$Bill],
11  Jan_Billing.[Balance],
12  Jan_Billing.[Paid],
13  Jan_Billing.[Note]
14 FROM
15   MasterClientList
16 LEFT JOIN
17   Jan_Billing ON MasterClientList.[Medicaid#] = Jan_Billing.[MED ID]
18
19 UNION ALL
```

HOW IS THE INFORMATION COMBINED?

- Select information from the 'Clients' and each monthly billing table is combined into one using SQL (Structured Query Language) . Queries were created for each billing month
- Information from the two tables are joined on the client's Medicaid number

OTHER TECHNICAL TID-BITS:

- The Database has been split into a 'Front-End' and a 'Back-End';
 - Front-End** – contains the forms and the reports
 - Back-End** – contains the tables and queries and is not accessible to unauthorized individuals maintain the database's integrity
- Specialized reports can be created as needed
- All data tables can be exported into either CSV or Excel files and used for visualizations
- Update Queries are incorporated to ensure that any new clients appears in the appropriate billing month's data entry table(s) and reports
